

## 6,000 Challenge Petition

**Dear Congress** | Every day, 6,000 children lose at least one person to AIDS. As an advocate for children, families, and communities affected by the global AIDS pandemic, I am asking the U.S. Congress to continue its commitment to the global fight against AIDS by swiftly reauthorizing the Global AIDS bill by the end of this year, with at least 10 percent of the budget designated to directly help orphans and other vulnerable children.

The AIDS pandemic is the greatest humanitarian disaster of our time, leaving a generation of children in jeopardy. I believe that America has established strong leadership in the global fight against AIDS and must continue to do so by reauthorizing the funding and ensuring that affected children are provided for.
