**Easy** - These days are exactly what they say they are. They should be done at a comfortable, conversational pace. If you find yourself running so hard that it's impossible to talk, you are running too fast.

**Hard** - These are days to push yourself. You can do a tempo run by pushing yourself at a faster pace than usual or find a hilly route to give yourself more of a challenge. You could also do a fartlek run (alternating running 5 minutes fast, 5 minutes slow).

**Long** - These runs are for building up endurance. Don't worry about your speed, just focus on running a nice, steady pace.

**Cross Training** - This is a chance to do a non-running aerobic exercise, such as swimming, biking, or any other moderately intense workout. The point is to continue improving your fitness while giving your "running" muscles a rest.
